### Product Features

To receive a **twofold effect**, we combined "Moromi Vinegar", which is rich in amino acids and citrates and forms the basis of fermenting the traditional Okinawan beverage "Awamori", with the luxury "White 6-Cloved Fukuchi Garlic" from Aomori. This makes it a potent **supplement that addresses women's concern about "Beauty" and "Vitality"**.  
The ingredients for "Moromi Vinegar" are **100% Okinawan**, and only **100% authentic garlic from Aomori** is used. By keeping it local, we ensured that it is a **Japanese product**, conforming to strict Japanese standards.

### Marketability

Typical concerns of aging (weight, beauty, health) are everlasting obstacles for women from maturity onward. "Moromi Vinegar" gained popularity among a wide array of customers, encompassing women in their **30s**, who stated to feel concerned about aging, **to women well in their 70s**. Among them, those who have the most urgent feelings about weight-loss, beauty and health are the core target group of the 40-60 year olds. Actually, after taking the product, accompanied by moderate exercise, many customers left us a lot of positive feedback, in the likes of **"My body feels lighter"** or **"My body became cleansed and slimmer"**.

### Selling Points

- The **amount of amino acids**, which are helpful with weight loss and cosmetic improvement, **is 77 times higher than that in common rice vinegar, and that of citrates is 174 times as high**. A body that suffers from a lack of exercise and a slowed down metabolism **can get the needed support, thanks to the power of amino acids and citrates**.
- It contains **19 types of amino acids (including essential ones)**, which are a fundamental building blocks for collagen. That makes it work as a beauty product.
- We **only use the brand garlic "White 6-Cloved Fukuchi Garlic"**. "White 6-Cloved Fukuchi Garlic" is characterized by a big and shining white bulb, which is tightly packed with 6 cloves.
- For people who are concerned about the particular smell of garlic, we **developed a special extraction method that filters out the parts of the garlic that generate the smell** while the parts that contain the nutrients are safely stored in the capsule.
- It is a **product of Japan**, produced in our factories and subjected to rigid quality control.
- Garlic was apparently eaten by the builders of the Great Pyramids, making it one of the most ancient and traditional health foods of all times.
