**Efficacy** Squalene improves blood circulation, provides oxygen to the tissues, revitalize cells, and works as an anti-oxidant. The natural components extracted from the species of *Centrophorus granulosus*, a deep sea shark of Okinawa's seas, using our technology is exclusively used as raw materials for our products. The liver oil of the deep sea shark contains squalene, unsaturated fatty acids (including DHA, EPA, vitamin A and Vitamin E), squalen and arcoxyglycerol. The natural arcoxyglycerol is a special marine fatty acid which supports the production of white blood cells especially that of lymphocytes. Thus, it plays an important role in maintaining a proper function of our immune system.

**Product Description** It is living dietary supplement. A deep sea shark came into life 0.4 billion years ago, and has shown very limited evolution. However, deep sea sharks survived under highly stressful living environment of dark sea with high water pressure and limited availability of oxygen at a depth between 600 and 1000 meters under the sea. Squalene Nama is an excellent dietary supplement made by extracting natural ingredients from deep sea shark using a unique technology. Nature's gift and natural powder of mysterious oceanic beauty are packed for you to try.
