(before tax 3,500yen)

SouSou is a fermented plant extract consisting of 12 varieties of carefully selected locally grown native wildflowers that have been fermented with lactic acid bacterium. Added to this base is the best from the Okinawan land and sea, including moromi vinegar, fucoidan extracted from mozuku, and noni juice. This is a highly recommended health supplement.

Kumejima pongee
Okinawan traditional craftwork, and its techniques and traditional processes have been developed since the times of the Ryukyu Kingdom, and are all hand-made. They basically came with a glossy black color, but also have characteristics of colors including navy blue and kasuri patterns

Product information

The plant fermentation extract "Soh Soh" is a health supplement drink that uses 12 types of carefully selected Okinawan wild herbs, that were fermented using lactic acid. With the plant fermentation extract as a base, Okinawa's materials from the land and sea including moromi vinegar, fucoidan extract derived from mozuku seaweeds, and Morinda citrifolia (noni) juice are condensed in this health supplement drink. Please make use of this product for managing your health and your spouse's health.
