

Agaricus product

 **KANEHIDE BIO CO.,LTD.**

[Product Name]

**Agaricus
Extract Powder
Sticks**

[Local market Price]

15,750yen
(before tax 15,000yen)

Agaricus is a mushroom that is plentiful in minerals such as β -D-glucan and phospholipid. At Kanehide Bio we grow Agaricus in-house paying close attention to the cultivation process. Each mushroom is carefully cultivated on a bed of 'bagasse' the by-product of sugar cane processing. We hope you will make Agaricus a part of your healthy daily diet.

Product
information

Agaricus blazei mycelia produced based on sugar cane waste, called "bagasse" and our original Agaricus blazei mushroom are extracted by our unique method of manufacturing. Active ingredient from Agaricus is made into easy-to-intake granule type product.

Per 1 pack (2.5g) Fat 0.01g, Carbohydrate 2.34g,
Sodium 1.59mg**

Bingata

This is a traditional dyed cloth that represents Okinawa. It was used to make clothing for the nobility during times of the Ryukyu Kingdom. Due to such trend, it is often used for the colorful costumes of the Ryukyuan dance.
