Product image					
Particle size	5～13 mm				
Net contents	400g/unit (40 units/case)				
Prices (excl. cons. tax)	MSRP	JPY5,000./unit			
JAN code	4571158790014				
Package	Material	Width (cm)	Depth (cm)	Height (cm)	Weight
Inner pouch	Plastic	11.5	6.0	21,4	416.0g
Product box	Craft paper	9.8	17.3	5.3	487.5g
Case (for transport) (40 products)	Craft paper	51.0	23.5	35.5	20,600.0g
Manufacturer	Coral International Inc.				
Expire date	3 years from manufacture (Unopened)				
Storage Method	Store in a cool, dry place away from direct sunlight and at room temperature.				
Features	* The porous structure of fossil coral firmly adsorbs chemical substances, such as chlorine, formaldehyde, etc. in the tap water and removes them. * Minerals that dissolved makes the water tasty.				
Usage instructions	* Putting 200g of fossil coral grains in 2-liter water and leave for 2 hours. The water becomes tasty mineral water. * After filtration use; -place it in the refrigerator, closet and etc. as deodorizer. -Mix with soil in the kitchen garden as heavy metal removable agent.				
Packaging Labeling	All package information is provided in Japanese.
